

Pivot App

Overview

Leverage Smartsheet pivot tables to analyze your data and make better decisions, faster. Pivot tables slice-and-dice your data and create a meaningful summary sheet from data stored in a sheet or report, and enable you to create charts in dashboards with report data. Smartsheet pivot tables update summary sheets as your data changes, helping you access and organize the data you need, quickly.

With Pivot App, sales managers can produce monthly breakdowns of their sales pipelines by rep, marketing can breakdown customer data to identify key segments, and service providers can track service offerings to identify opportunities with their customers.
